

Project Research Report

For this assignment, you will submit an annotated bibliography of the research compiled for your course project during this semester. The purpose of this assignment is to prove to your “client” that your proposal has been well documented using credible research (including a **variety** of books, newspaper, journal, and web articles); in doing so, your work will require you to include only the research that is most relevant to the course project by organizing the research into manageable chunks.

Each student will turn in **6-8 annotated sources in one document, no page breaks**. The document will be organized alphabetically. Each source will be annotated in 250 words by **answering the following questions**:

- Provide a brief summary of the author’s arguments. (paragraph 1)
- How does the author’s background contribute to his/her/their knowledge of the arguments? (paragraph 2)
- How does the resource fit in relation to your arguments? (paragraph 3)
- What will the “client” take away from being aware of this resource? (paragraph 4)

The assignment, when completed, will take up 6-8 pages (possibly more). As with most written assignments in this class, it will be in MLA style and have significant changes from rough to final versions. Check syllabus for due dates and point total. Staple one workshopped copy to the back of the final draft on the final due date.
